

Tool Time workshop -- overview

This lecture/demo workshop will inform you of the essential tools that we use as quilters that you may or may not have used. Some will be totally new to you. Some may not.

You will receive a list of all of the tools that I will demonstrate for you. The list will help you to build a complete Basic Sewing Kit - the items on this list are the essential notions and "tools" that you will need to make your quilts better.

Bring a pen so you can take notes. There will be room on your list for your personal comments and rating of each of the "tools".

I will also share a trunk show of quilts that I have made using the tools. Please feel free to bring a camera - I allow touching and picture taking.

Be prepared to be amazed and informed!

*There is no materials fee for this workshop.
I will have tools available for sale after the workshop, if desired.*

If you have any questions, please email me at the email address below.
